**Next Sunday** we anticipate the celebration of the Lord's Supper as we remember Jesus' great sacrifice for us. As we do so we look at the beatitude for those who are meek, a great description of the way Jesus lived as He journeyed to the cross. God Himself expressed meekness beyond any human. Why is it that we fail to be meek even though we are only human but God, the most powerful being in the universe was absolutely meek?

**Verse of the Week:** "Blessed are those who mourn, for they will be comforted." Matthew 5:4

**This week be in prayer for:**

- Kentucky as they will be offering Bible courses in public schools
- Our witness in this community
- Faith Community Church in Beaver Dam

- Easy access to God's Word

We give thanks for those who are retiring from their offices (Brad Schouten and Dave Venhuizen as deacons & Denny Vande Berg, Mike Vander Berg, and Gregg Zonnefeld as elders). Please take a moment to give thanks to those who are retiring and lift up the new council in your prayers as they seek God's guidance in leading and serving this congregation.

# CREATION MOMENTS

Proclaiming Evidence for Truth  
THIS WEEK'S CREATION MOMENT

## Has Evolution Produced Anything of Practical Value?

Where wast thou when I laid the foundations of the earth? declare, if thou hast understanding. – Job 38:4

Dr. Don Batten is a plant scientist and creationist, and he is the author of countless books and articles as well as booklets on science topics that Creation Moments has distributed over the years. Recently we came across an interview where Dr. Batten was asked to respond to the claim being made by evolutionists that science would be impossible without evolution.

Listen closely to what he said: "I don't know anything of practical value in science that has come out of evolutionary thinking. In fact," he added, "evolutionary daydreaming has given rise to many dead ends." As an example, he mentioned "the inappropriate treatment of back pain – trying to make our backs more like those of our supposed ape ancestors – which," he added, "actually makes back problems worse."

But Dr. Batten wasn't finished: "Then there are the false notions that some organs are useless leftovers of evolution, or that DNA that we don't understand is 'junk'. Such ideas," he said, "impede scientific progress, as they influence scientists not to bother investigating their function."

He also mentioned the many frauds committed in the name of evolution – like Haeckel's embryo drawings, Piltdown Man and the feathered dinosaur Archaeoraptor. All of these and many more hoaxes have stood squarely in the way of scientific progress. So, young people, if you love science, do what Dr. Batten has done – become a creation scientist and accomplish great things!
